# Wired Network Access – OSX
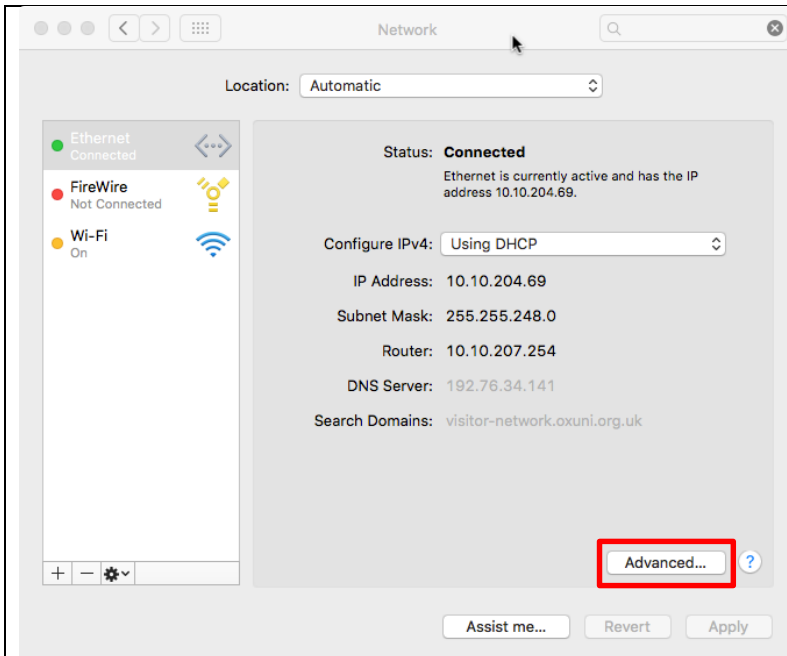

Last updated on 14/03/2016

## Prerequisites

Your computer must have a wired network port (or via adapter) and you must have valid Remote Access user account details. If you are unsure about your Remote Access user account details contact the IT Office (it-support@queens.ox.ac.uk or 01865 279205).
## Guide

| | |
|---|---|
|  | If you haven't done so already plug in the network cable – after a short wait the **OWL Visitor page** will appear in Safari. |
|  | To actually gain access to the internet **head to the Apple Icon** and **click System Preferences**. |
|  | From the window that appears **click Network**. |

| | |
|---|---|
|  | **Click Advanced**. |
|  | **Select 802.1x** and tick the **Enable automatic connection** option. Click **OK**. |
|  | Click **Apply**. |
|  | After a short wait a prompt will appear, **enter your remote access details** (ensuring that you use @OX.AC.UK at the end of your username) and **tick the Remember this information box**. **Click OK**. |

| | |
|---|---|
| **Verify Certificate** <br><br> **Authenticating to 802.1X network** <br><br> Before authenticating to server "radius.oucs.ox.ac.uk", you should examine the server's certificate to ensure that it is appropriate for this network. <br><br> To view the certificate, click 'Show Certificate'. <br><br> ?    [ Show Certificate ]      [ Cancel ]   [ **Continue** ] | At the next prompt click **Continue** to complete the connection. |
| **You are making changes to your Certificate Trust Settings. Type your password to allow this.** <br><br> Username:   James Preston <br><br> Password:   [ ] <br><br> [ Cancel ]    **Update Settings** | Finally **enter the password for your Mac** and **click Update Settings**. <br><br> You will now be connected to the Internet. |
